Those in attendance:
Dennis Lewarch, Tribal Historic Preservation Officer, Suquamish Tribe
Alison O'Sullivan, Biologist, Suquamish Tribe
Susan Donahue, KC DCD
Christina Kereki, KC DCD
Dave Nash, KC DCD
Jessica Coyle, PGST

The Agenda below was addressed as follows:
Discussion on archeological, historic and cultural resources information of Kitsap County to be incorporated in the SMP update

SMP Take Away Tasks or follow ups are listed below:
- KC will work with Allison O'Sullivan, Dennis Lewarch and Jessica Coyle on Archeological, Historic and Cultural Resources for inclusion in the Inventory and Characterization Report

- KC will provide a base GIS layer that shows the shoreline drift cells for Kitsap County and the proposed shoreline jurisdictions.

- Suquamish Tribe will provide general information regarding Archeological, Historic and Cultural Resources per drift cell for Kitsap County (to be included in the Inventory and Characterization Report)

- General Comment: Suquamish Tribe is developing a predictive sensitivity model that predicts areas of high probability for cultural resources in Kitsap County. The model is entitled “Archeological Sensitivity Model of Kitsap County” and is funded by the Washington Department of Transportation. As a result, Kitsap County will be provided with GIS maps that summarize cultural resource areas to be used for planning and permitting purposes at a later date. The Port Gamble S'klallam Tribe will also have access to the model’s results. The end schedule for this information is June, 2010.

- General Comment: Suquamish Tribe clarified that Port Gamble S'klallam Tribe’s participation on the SMP taskforce is not representative of the Suquamish Tribe
