To: Kitsap County Planning Commission  
From: David Greetham, Environmental Planner  
Subject: SMP deliberation materials for August 21 meeting  
Date: August 21, 2012

Dear Planning Commission Members:

The attached materials are provided in preparation for the August 21 SMP deliberations meeting.

Each item is associated with a key topic that was continued for further discussion at prior meetings, as described below:

1. **Aquaculture**
   - Taylor Shellfish Co. comment response matrix (SMP Chapter 2, Definitions; Chapter 4, General Policies; Section 7.4, Aquaculture)

2. **Natural Designation**
   - Maps showing identified areas for reconsideration as Natural, both county-wide and by Commissioner District.

   Staff went through a process, based on the Natural criteria and best professional judgment, to identify 21 new segments that could be supported as Natural if the Planning Commission chooses to recommend such. The identified areas could be defensible based on consideration of the criteria for Natural (SMP Section 3.2.5), policies for Shorelines Of Statewide Significance (SMP Section 4.11), length of intact vegetation, and local conditions such as existing upland area zoning and infrastructure.

3. **Port Gamble Redevelopment**
   - Draft language for Port Gamble flexible redevelopment option (SMP Section 3.2.3.C, new policy 7). Should the Planning Commission choose to support the proposed management policy, associated subsections will be revised as necessary for consistency prior to the final vote on the SMP.
