--Margaret and all members

8:30 Public Comment

8:40 Tee Up for December 2 and Adjourn
Kitsap County Shoreline Master Program Update
Shoreline Master Program Task Force
November 4, 2010
Preparation and Discussion Guide

The primary focus of this meeting is an educational review of the requirements for Environmental Designations. The DCD team will provide a summary of the proposed initial approaches they will take towards drafting Environmental Designations in the Shoreline Master Program.

The meeting will begin, however, with Task Force approval of two documents: your recommendations related to public access, and your memo to Kitsap County Commissioners. We have completed several drafts of the recommendations, with the final version emailed to you on October 22. A draft of the memo was also emailed to you on the 22nd. Discussion, if any, should be very brief around these two items. A quick “thumbs up” from the group will move these documents forward to the Kitsap County Board of Commissioners.

Environmental Designations
These are a core component of the Shoreline Master Program. Susan and Joe will talk about the environmental designations process, and the approach Kitsap County intends to take in determining these environmental designations. We’ll then ask for your feedback:

- Do you generally agree with the proposed approach by DCD?
- If you don’t agree, what changes in the approach would you suggest?
- Do you have any additional comments/suggestions on the environmental designations process?

The goal of this discussion will be to answer any questions you may have, and, it is hoped, to get a general “stamp of approval” from the Task Force so that DCD can move forward with the environmental designations process.

Public Comment
Ten minutes of public comment are built into all of our meeting agendas.

Tee up for December 2: The December 2 meeting will be focused on additional information and education related to No-Net Loss, Cumulative Impact Analysis and Shoreline Restoration.
