

DRAFT SHORELINE DESIGNATIONS

Preliminary Map For Discussion Purposes Only

Shoreline jurisdiction boundaries depicted on this map are approximate. They have not been formally delineated or surveyed and are intended for planning purposes only. Additional site-specific evaluation may be needed to confirm/verify information shown on this map.

USE OF THIS MAP IMPLIES THE USER'S AGREEMENT WITH THE FOLLOWING STATEMENT:

Kitsap County disclaims any warranty of merchantability or warranty of fitness of this map for any particular purpose, either expressed or implied. No representation or warranty is made concerning the accuracy, currency, completeness or quality of data depicted on this map. Any user of this map assumes all responsibility for the use thereof, and further agrees to hold Kitsap County harmless from and against any damage, loss, or liability arising from any use of this map.

Map Date: January 28, 2011

MASON COUNTY

Data Sources:

Ownership Parcels were digitized by Kitsap County GIS staff from 1:12,000 scale (1" = 1,000') originals and updated from County Assessor's records.

The hydrographic features presented on this map were drawn from digital data purchased from the Washington State Department of Natural Resources. The original scale is 1:24,000 (1" = 2,000'). The water type codes identified for streams are documented in the Washington State Forest Practices Act

Transportation information from Kitsap County CENCOM. Other roads created by Pierce, Mason, King and Jefferson Counties

- URBAN CONSERVANCY
- NATURAL
- HIGH INTENSITY
- AQUATIC

20 CFS+ MAF STREAMS

Rivers with a mean annual flow (MAF) greater than OR equal to 20 cubic feet per second (CFS)

Lakes and Ponds

The Shoreline Management Act applies to lakes and reservoirs greater than 20 acres in area. This determination is defined by a continuous ordinary high water mark and may include vegetated areas and open water areas. The position of the Ordinary High Water Mark (OHWM) in relation to extreme high and extreme low water varies from site to site. The OHWM will vary over time and according to factors such as wind, waves, erosion, accretion, soils, substrates, vegetation, land use changes, runoff, groundwater, presence of peat, constancy of pool elevations, and the activities of beavers and other organisms.
