DRAFT NATURAL SHORELINE DESIGNATIONS
FOR DISCUSSION PURPOSES ONLY

NATURAL DESIGNATED LANDS

- The shoreline is ecologically intact and functions as a part of a larger, representative ecosystem.
- The shoreline is largely undisturbed by human activity and retains its ecological integrity.
- The shoreline is considered to represent ecosystems and geologic types of particular scientific and educational interest.
- The shoreline is unable to support new development or use without significant adverse impacts to ecological functions or risk to human safety.

NATURAL DESIGNATED LANDS

- The shoreline is ecologically intact and therefore currently performing an important, irreplaceable function or ecosystem-wide process that would be damaged by human activity.
- Largely undisturbed portions of shoreline areas such as wetlands, estuaries, unstable bluffs, spits, and beaches.
- Ecologically intact = often native vegetation; generally free of structural shoreline modifications, structures, and intensive human uses.
- May be inside or outside of UGAs.

USE OF THIS MAP IMPLIES THE USER’S AGREEMENT WITH THE FOLLOWING STATEMENT:

Kitsap County disclaims any warrantee of merchantability or warrantee of fitness of this map for any particular purpose, whether expressed or implied. No representation or warranty is made concerning the accuracy, currency, completeness, or quality of data depicted on this map. Any user of this map assumes all responsibility for the use thereof, and further agrees to hold Kitsap County harmless from and against any damage, loss, or liability arising from any use of this map.

Map Date: March 2, 2011

Data Sources:

Ownership Parcels were digitized by Kitsap County GIS staff from 1:12,000 scale (1" = 1,000') original and updated from County Assessor’s records.

The hydrographic features presented on this map were drawn from digital data purchased from the Washington State Department of Natural Resources. The original scale is 1:24,000 (1" = 2,000').

The water type codes identified for streams are documented in the Washington State Forest Practices Act.

Transportation information from Kitsap County CENCOM. Other roads created by Pierce, Mason, King and Jefferson Counties.

Combined bathymetry and topography of the Puget Lowlands, David Finlayson, School of Oceanography, University of Washington, 20050124, Washington State (January 2005).
